

THE 4-LOOP GIANTBAG BY
INTERJUTE

‘THE INTELLIGENT BAG PROVIDER’

THE 4-LOOP GIANTBAG BY INTERJUTE

Based on 50 years experience supplying flexible packaging materials, Interjute has achieved a leading position in the international bulk packaging sector. We offer quality, efficiency and competitive prices. Interjute is truly the Intelligent Bag Provider.

The world of flexible bulk packaging materials consists of a wide variety of products. We are able to deliver hundreds of different product specifications from stock. The actual scope of our total product range is difficult to quantify due to the large number of tailor-made products.

For this reason, it's almost impossible to present a total overview of our product range. To get a good idea of what we offer, you can surf to our product information pages at www.interjute.com.

GiantBags with 4 lifting loops

We supply a wide range of FIBCs (Flexible Intermediate Bulk Containers). Thanks to our own East European production facility and a limited number of exclusive partnerships in Turkey and the Far East, we can offer an optimal price/quality ratio for all FIBC specifications. 4-loop bags are used for many applications. It is a tailor-made product.
